Professional Summary

Professional in Psychology, completing a specialization in Software Development (English B2). Certified as a Full Stack Developer. I have experience and expertise in web development, integrating technical tools like JavaScript, MongoDB, Express.js, React, and Node.js to create solutions that optimize digital presence and streamline day-to-day operations. I'm characterized by a high ability to swiftly solve technical problems, innovate in every development project, pursue quality, and deliver the best user experience. Currently seeking a new professional challenge as a Full Stack Developer, eager to participate in development projects within the Tech sector.
